

BUDGET ISSUE SUMMARY FORM

Budget Issue Title: Records Management and Document Imaging System

Department: Office of the City Manager – City Clerk

1. Issue Summary (briefly describe the budget issue):

This project represents Phase II of a Records and Information Management Plan. The plan was divided into two phases, the first of which dealt with such items as the development of a Citywide records retention plan, development of a vital records recovery plan, inventory and indexing of inactive records and the training of staff in public information laws. The pending completion of Phase I provides the foundation for Phase II, which would explore the application of document imaging and other advanced technological solutions for effective Citywide records management.

Significant Needs: The City's current records management system is obsolete and does not support timely and efficient retention and retrieval of information. Records searches often have to be done by hand which is time consuming and inefficient and City-owned storage space is at capacity. The City is continually challenged to meet the requirements of the Government Code related to records retention, internal requests for information and Public Information Act requests.

Expected Benefits: Improved efficiency in retaining records and responding to request for information retrieval. Possible reduction in costs related to off-site storage and records retrieval by vendor.

Postponement Outcome: Records retention and retrieval systems will continue to be inefficient and outdated.
